The graphics are nice.

And list of pros is complete.

The music gets tedious (it's pretty cool for the first few minutes but...), the mechanics are mediocre (No high grounds, no cover, just stand and shoot and run away), the AI is... well there's no AI really.

And after a few levels, I'm already bored.

I could keep going on about the dialogs that have to be read at the beginning of each level (Really, bubble dialogs! No voice overs!), or the really annoying 'Share' button (Seriously, that's just looks needy). But I think I've made my point.

And no, I'm not done. There's an achievement for losing a toon! How is that an achievement?

There. Done now.

A better AI, more advanced mechanics and a more interesting storyline would have kept me happy for a few more hours, maybe even made me tick the other box...

. Awful purchase at .74 cents. Unless you have an old computer with windows 95/98, then there's no reason to ever fool around with it because it will not run at all. Minimum requirements my\u2665\u2665\u2665\u2665 I spent way too much time trying to configure this game to run but nothing worked. Don't even bother scouring the discussions around getting this game to work, because even if you do get it to work, I hear it's nothing but buggy. Save those three quarters for a nice piece of gum.. absolutely terrible. Very nice game. Puzzles are well designed and really mind demandant. Had to crash my brain very often to accomplish the goals. Really entertaining, I recommend this game.. Literally the worst game I've ever played, not even ironically fun. This is the first HOG I ever played and it helped me find the charm of these games. It is still my favorite game even though i have played a lot of games which I really loved.

- Music/soundeffects

I love the music. Even if the music isnt as variable as in some others games it fits the situation and helps you get a good feel into the story.

- Art

The Art is just beautiful. Not only in the HOP but also overall while you travel trough the whole world(hospital) it is made with sensitivity and love. The sins for example are just gorgerous made and fit perfectly the looks I would have about them.

- Puzzles/Riddles

The Puzzles wernt that hard compared to other HOG but I still enjoyed them. A little thinking is still needed.

- HOP

For me this is one of the mainpoints about rating a HOG good and bad. In this instance it was a real challenge sometimes. Not cause the HOP wernt well made or the objects were hard to find (some are really nice hidden in the art), but cause of the use of some words to discribe things. My mother language is german and even tough my english isnt that bad i didnt knew a lot of these words and had to look it up. Some are rarely used nowadays what made for a real challenge and thinking outside of the box. Which is a pluspoint for me.

- Story

I just looooved the story. It starts with a nice little horror flare with the right sounds/music to help you get a good feeling into it. You dont get a deep inside the protagonist but about the other characters. Normaly it missing somethign if you dont know a lot or anything at all about the protagonist, but in this instance you dont need it. The story about the others cahracters or better said the sins is really well made. There also is a BONUS story which helps you get a little inside about the character and why he is the only "survivour". Try to read every note and the diary. Without the whole story will be boring.

- Movies

I really love the movies. They are made with love like the art and even tough they are only short are perfect,

---

- Voices

Sadly this is a minus point for me. Even though the music/sound effects are great you don't have a single spoken line (except in the Bonus story) which would have made the game even better.

- Ending

Even though it seems a little rushed in the end and it ended with an open note I liked it. It somehow seemed fitting for me and you can think about it yourself.

- Map

You got a map!! In many HOG you don't have one and you walk clueless around the whole world. In this game you have a map that shows you where you can still do something be it an HOP or something else. Only thing I hate about it that you have to walk yourself and can't "teleport" to the location you want.

Overall one of the best HOG in my opinion. If you want to start with an HOG and don't want to play a really really hard one try this. I mostly played it (multiple times already) because of the enjoyment and not because of the difficulty

. Not a big fan of Sydney's player model (facial and hair cut wise) But her voice is alright and her perk deck is pretty cool. Gun looks cool and hits hard when building the right mods for it. Melee sucks still but butterfly knife looks awesome. However, it's another DLC from Overkill that still shines away some new players and older players. Get it on a sale or just ignore this one. It's nothing big and special.. the game is solid and fun despite the negative reviews.

Yes - if you are using headphones sound will come out only out of one speaker

Yes - there is an annoying advertisement for Nux at the end of a chapter.

however, it does little to diminish from the game's fun.

there are plenty of different enemies. the music is catchy, albeit worse than the original. and of course, the lovely clay animation is still there. and the controls are still tight and responsive to boot.

so if you are not someone whose game experience is ruined by a few minor flaws. get this game. it's a fun schmup

. So disappointed with the devs. The game had so much potential but they just abandoned the game and ran off with the money.

Fun Addictive battle mechanics. TLDR :

- Bad copy of Death Rally 96' or 2k12
- physics and handling are horrible, can't steer, glued tires
- weapons are not that exciting to use, you'll prefer to lay mines everywhere
- only one big map reused with barriers and reverse mode to get 16 "different" races
- quiet easy achievements except the final one, still a doable 100%. At least, achievements are all working OK, good job about that
- Steam cards, which is the only thing interesting in the game

This game is probably the worst of the genre, where the first Death Rally, released back in '96 is still a reference. Even the most recent Death Rally, out in 2012, which was quiet bad, looks good compared to Burning Cars.

First, the story : there is none. Just read the "story" on steam page, that's it. So its a championship taking place in an open-air sewer island, with radioactive waste. You get to drive a trash truck against 3 other drunk bums, shooting and ramming on each other to get first place, get money and points for the 16 rounds of the championship. Now the weird part, the game is called Burning Cars, but it's not really about cars, only trash trucks and flying buggies.

Those vehicles are armed with various stuff from shotguns to mines dispensers, and nitro, and upgrades. That's for the "Burning" part of the game, you'll often catch on fire driving in those green slimes and from opponents attacks.

About the racing aspect, it's the most tedious and masochist part of the game. Driving those things feels like there is no steering wheel, its a pain to take a turn, like if the tires got glued on the concrete. No handbrake or brake at all to take some drifts in the tight turns. You're lucky if you don't hit a barrier that will throw you into the sky or in reverse direction, especially with those buggies. The walls are also glued, because if you come too close from them, good luck to get off it. Easy tournament let you restart a race, so hopefully you can make it first place, as the opponents are sometimes dumb as hell and got stuck in a wall. Nothing more to add about the gameplay, it's just horrible. Take a careful look at the trailer video on Steam store, it'll show you all the pain you will get about the no-steering and flying on wall thing.

Thankfully, the achievements are quit easy to accomplish, the most frustrating is the hard tournament which will accept no failure, because you can't restart the race when it turns bad, or you go above a barrier or even out of the map, falling in the black void forever... There is steam cards too, but it's only to grab some money they won't make from selling the game itself.

Its a real shame because graphics are ok, of only physics was good, with more environment variety, and a multiplayer mode. Don't get this game, unless you get it in a bundle, its pure pain and frustration for a masochist price. You've been warned.. Personally I enjoyed the entire trilogy, and I do recommend this to anyone who enjoys being put in the center of a good story... But it was a bit linear with kind of a straight storyline. Not very many story twists or turns but it really left a big impression on me as a choose your own adventure style of game. Would buy again.. Classic HOG that set the bar for presentation and puzzle types back in its day. No longer groundbreaking, but still worth playing today!. quote;Donald Trump's tiny little hands sprinkled bonsai clippings all over my long, firm, staff and tragically fell in love with a deep hobbit hole and that corner mouth white stuff, now fly you fool!". Really simple game without gore and violence but nudity and its real cheap

I already play this like im doing speed run

like 5 minutes gameplay and your done!. one of these games where steam forces you to play at least 5 minutes... otherwise you are not allowed to wite a review where you can tell the rest of the world that the game is worth nothing!. really fun game if you like driving this is the game for you even if youre not into trucks
